-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

This office action is in response to applicant's election filed September 30, 2005.

Election/Restrictions

Applicant's election of Species I, subspecies A in the reply filed on September 30, 2005 is acknowledged. Because failed to indicate if the election was with or without traverse and applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Thus, claims 4-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species¹.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear due to the use of the word "including"² in claim 1, if the resist film is made from a hydroscopic compound or as indicated in

¹ In applicant's response, pursuant to 37 CFR 1.121, a correct status identifier (withdrawn, currently amended etc.) for each claim must be cited or applicant's response will be held as an intentional non-responsive.

² Synonymous with "comprising".

applicant's specification (Page 3) that the compound is formed "onto the surface of...resist."

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Sugeta et al. (U.S. 2005/0009365).

Sugeta (Par. 0017, 0020, 0021, 0033) discloses:

(cl. 1) a pattern formation method (title) comprising the steps of: forming a resist film made from a resist material ("photoresist"; Par. 0019) including a material of absorbing moisture ("ethylene glycol"; Par. 0033) performing pattern exposure by selectively irradiating said resist film with exposing light while supplying immersion solution onto said resist film (Par. 0017, 0020); and forming a resist pattern by developing said resist film after the pattern exposure (Par. 0017);

(cl. 2, 3) wherein said material of absorbing moisture is hygroscopic compound or a rare earth compound of ethylene glycol (Par. 0033).
